# Breaking Bad News

## Conveying Bad News in Medicine

Every day, people in hospitals are confronted with news which dramatically changes or even destroys their plans for their lives. Being diagnosed with cancer can be one of such shocking news. Usually the fact is a blow of fate in itself. But what's even worse is that people are given such information in corridors, floors, in a hurry and with no preparation whatsoever. These news are often broken unprofessionally, not to say catastrophically. Breaking bad news is one of the least liked and most feared tasks in a hospital.

Yet it is possible to learn this form of communication. How a conversation like this proceeds has nothing to do with empathy or feeling, but with professional conduct and controlled communication skills. This book provides all the tools you need using individual practical cases.

### Target groups:

Doctors, nursing staff and other specialist psychological professions involved in breaking bad news, students of such professions, patient organisations and all emergency services

## Breaking Bad News Conveying Bad News in Medicine

By Dr. med. Peter Langkafel  
and Dr. phil. Christian Lüdke.

2008. 108 pages. Bound in boards. € 29,-  
ISBN 978-3-87081-636-0  
Economica Verlag

# The Curry Gang

## Stories for Preventing Violence

Training and educational aids for teachers, trainers and parents

The Curry Gang is an experience-based textbook, reading book and workbook for violence prevention among children and adolescents. Seven stories written from the standpoint and in the language of young people tell of things which are unfortunately part of their everyday lives: horror videos, fights, pot-smoking, blackmail or killing sprees.

There follows an extensive section containing work materials, templates, projects and role plays for teachers, social workers, youth workers, trainers and parents of children and adolescents aged 10 to 15. It is a huge collection of ideas for anyone who wants to work together with children and adolescents to counter violence.

Potential victims learn self-confidence and self-assertion to prepare themselves for critical everyday situations. Violent children and adolescents learn to think about their behaviour, control their anger and develop empathy.

#### Target groups:

Teachers, educationalists, social workers, youth workers, trainers and parents.

### The Curry Gang – Stories for Preventing Violence

Training and educational aids for teachers, trainers  
and parents

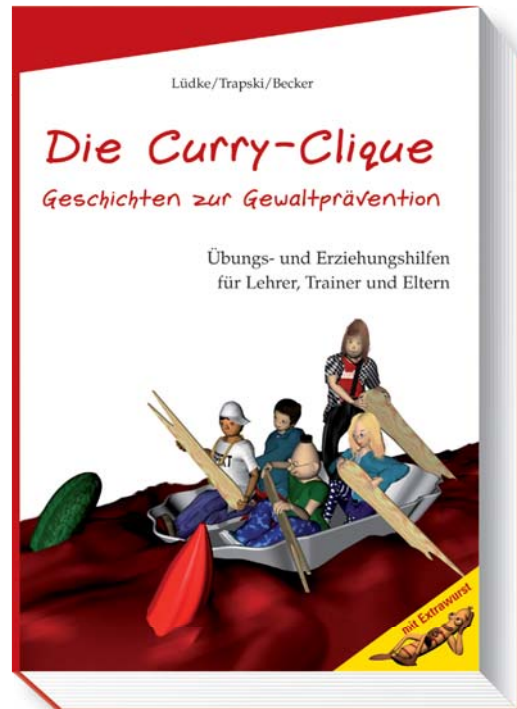

By Dr. Christian Lüdke and Peter Trapski.

Illustrated by Andreas Becker.

2008. 183 pages. Bound in boards. € 29,-

ISBN 978-3-87081-766-4

Economica Verlag

#### The Authors:

Dr. Christian Lüdke is a child and adolescent psychotherapist, Managing Director of TERAPON Consulting GmbH and author of "The Little Samurai Mio Mio Mousebear".

Peter Trapski is a karate teacher and expert on the prevention of violence. He works in management training for special police units.

The illustrations are by Andreas Becker, graphic artist, illustrator and freelance artist.

PRESS

„The book itself is brought to life not only through the lively and yet very respectful language, but also through the numerous realistic illustrations which are very reminiscent of computer animated figures. ... The book is particularly recommended because it presents the topic in an accessible manner and yet still takes young people and the subject matter seriously. This makes it an enlightening, relieving and exceptionally motivating read, which is to be recommended not only to those involved „on the front line“, but also to those who bear direct or indirect social responsibility for the „ingredients“ and „channels“ of violence.“ (www.socialnet.de 21.7.2008)

# The Little Samurai

## Mio Mio Mousebear

Growing together strong through disappointments

Volume 2 of the successful guidebook "The Little Samurai Mio Mio Mousebear" offers background knowledge and approaches to solving problems in a proven manner.

For children one of the most important experiences in the family and early upbringing is dealing with disappointments. Whenever a child experiences disappointment, the connection to and trust in its parents and environment are shaken and put to the test.

The stories teach children to deal with day-to-day disappointments positively. The book instructs parents and other attachment figures to support children in using their disappointments to grow. This process changes children into strong, self-confident people.

#### Target groups:

Parents of children aged 3-8 years, grandparents, educationalists; psychotherapists and paediatricians as disseminators, advisory centres, and health insurance companies

### The Little Samurai Mio Mio Mousebear

Growing together strong through disappointments

By Dr. Christian Lüdke. Illustrations by Andreas Becker.

PRESS

„How do children develop stable personalities? With time, attention and tenderness. These are the ingredients required for turning "children" into "strong children", for children need orientation and adults who are there to help them. That's the only way they can deal with the many disappointments and fears, both large and small, which they face every day. Yet even parents don't know everything. They also need a helping hand, advice or an explanation every now and then. Christian Lüdke and Andreas Becker have achieved both of these goals. With the second volume of Mio Mio Mousebear they have created a book that devotes time and attention to children and also helps parents to better understand childhood fears and the ways in which they manifest themselves. This is a book full of practical counselling. We promise, you won't be disappointed!" (Nina Meckel, Editorial Department FOCUS-SCHULE)

# The Little Samurai

## Mio Mio Mousebear

Standing Strong Together against Children's Fears and Anxieties

Even small children can harbor serious fears – often more serious than one would believe. A study has demonstrated that around 10-15% of all elementary school children suffer from states of fear and anxiety at some point. It is often difficult for adults to recognize these anxieties and to penetrate their causes, let alone to take effective action. Parents would like to help their children, but they are often clueless.

The experienced child and adolescent psychotherapist Dr. Christian Lüdke recognizes these problems and has developed a unique concept which supports parents and children equally. It is a combination between a read-aloud book suitable for children and a scientifically-founded, therapeutically competent book of advice for parents, a book which offers a practical approach.

#### Target groups:

Parents of children aged 3-8 years, grandparents, educationalists; psychotherapists and paediatricians as disseminators, advisory centres, and health insurance companies

#### The Authors:

Dr. Christian Lüdke is a certified child and adolescent psychotherapist, along with being the executive director of TERAPON Consulting GmbH ([www.terapon.de](http://www.terapon.de)), which provides competent advice and solid support and assistance in all psychotherapeutic aspects of health management. Since 1997, he has been a regular expert and interviewee on television and in the press for topics pertaining to psychology and educational science.

Andreas Becker is a professional graphic artist and illustrator.

PRESS

„Child and adolescent therapists are instructed to provide support for the parents in their work. With his "little samurai", Christian Lüdke is giving parents a professional means of working alongside their children to either prevent problems or the assuage them. A guidebook which therapists can recommend in all good conscience. With this new, creative concept, the author demonstrates his experience – as much as a father as a therapist.“

(Prof. Dr. Rainer Richter, President of the German Federal Chamber of Psychotherapists)

# Understanding the German Health System

## Structures and Functions in Changing Times

## Understanding the German Health System

By Dr. Uwe K. Preusker

2008. IX, 348 pages, softcover, € 58,-

ISBN 978-3-87081-456-4

Economica

Anyone dealing with the German health system through their studies or work quickly discovers that this is an extraordinarily complex network of different subsystems, many of which are subject to even more disparate laws. The mixture of state regulatory authorities and self-regulatory powers, private practice and heavy bureaucratic regulation, free enterprise and corporate constitution is surely unique in this form the world over – making it a system that is complex and difficult to comprehend.

That is where this book can help. Not only does it describe the German health system in its current state, it also establishes its position in the developing health market. In addition, it gives a current portrayal of the fundamental changes undergone by the German health system as a result of the "2007 Health Reform". The book outlines the new regulations introduced by the reform, providing an analysis and discussion of their anticipated effects.
